

Specialty Medication Drug List

Coverage as of January 1, 2024

This is a list of the most commonly prescribed oral and injectable specialty medications as of January 1, 2024. Medications are listed alphabetically. Generic medications are listed in all lowercase letters and brand-name medications are listed in all capital letters. Bolded medications are new additions on this update. The drug list is updated often so it isn't a complete list of the medications your plan covers. Also, your specific plan may not cover all of these medications. Some plans have specific coverage requirements for specialty medication, such as limiting coverage to a 30-day supply or requiring prior authorization before your plan will cover the medication. You may have to use a specific specialty pharmacy to get coverage.

Medication Name

A

ABECMA
ABILIFY MAINTENA
abiraterone
